Rafael Cavalinhos

FULL-STACK DEVELOPER

rafaelcavalinhos2002@gmail.com
github.com/rafaelcavalinhos
linkedin.com/in/rafael-cavalinhos
rafaelcavalinhos.com

Full-stack developer capable of building complete applications independently across any layer of the stack. I launched a SaaS platform solo, contributed to the development of a civic platform used by real organizations, and developed mobile video game prototypes in a professional context. Practical experience in frontend, backend, databases, and deployment.

PROJECTS

Axon

getaxon.pt

ERP SaaS Platform - Solo Project

Full ERP platform built and deployed entirely solo. Covers tool management, document handling, consumables, HR, and workflow optimization end-to-end. Live in production.

Next.js | TypeScript | Tailwind | Node.js | Fastify | PostgreSQL | Docker | Cloudflare | Vercel | Railway

Território Participado

territorioparticipado.pt

Civic Participation Platform - Albatroz Digital

Active civic platform used by real organizations. Designed and implemented the full entity creation and management system - from backend endpoints and database logic to reusable frontend components.

Next.js | TypeScript | Node.js | Fastify | PostgreSQL | Figma

WattSwap

Projeto Final de Licenciatura

A platform for the management and commercialization of renewable energy, acting as an intermediary between producers and consumers. It enables the sale of surplus energy, the creation of customized energy contracts, and detailed consumption analysis.

ASP.NET Core MVC | C# | OAuth 2.0

Mobile Game Prototypes

itch.io

6 Prototypes - Bee Engineering Internship

Six advertising mobile game prototypes developed in rapid iteration cycles. Responsible for gameplay mechanics, UI flow, animations, audio integration and level design.

Unity | C#

FRONTEND

Next.js | TypeScript | JavaScript | React | Tailwind | HTML / CSS | Figma

BACKEND

Node.js | Fastify | PostgreSQL | REST APIs | Puppeteer | ASP .NET Core

DEVOPS & CLOUD

Docker | Vercel | Railway | Cloudflare | Git | GitHub

GAME DEV

Unity | C# | Aseprite

METHODOLOGY

Agile | Scrum | Jira

EDUCATION

Computer Engineering

Instituto Politécnico de Setúbal

10/2023 - 10/2025 · Setúbal

B.Sc. in Computer Engineering - software development, databases, networking, systems integration.

Game Dev & Multimedia

Instituto Politécnico de Setúbal

10/2020 - 06/2023 · Setúbal

Game design, multimedia production, graphics APIs, game engines, 3D/audio assets.

IT Systems Technician

Escola Tecnológica do Litoral Alentejano

09/2017 - 07/2020 · Sines

Web development, OS administration, relational databases, enterprise software.

EXPERIENCE

Internship - Albatroz Digital

07/2025 - 09/2025

Albatroz Digital - Almada, Portugal

- Designed and implemented a full entity creation and management interface from scratch.
- Built reusable frontend components ensuring visual consistency across the platform.
- Implemented backend logic, REST API endpoints and database communication to support the new UI.

Internship - Bee Engineering

04/2022 - 08/2022

Bee Engineering - Remote (Lisbon, Portugal)

- Developed six mobile game prototypes in Unity - gameplay logic, UI flow and level structure.
- Integrated animations, audio and gameplay feedback in fast-paced prototyping sprints.
- Iterated rapidly based on internal playtesting feedback.
